Did God allow October 7th? The answer is yes.
By Anthony of Boston

I came across an article in the Jerusalem Post written by Shmuley Boteach, entitled "Is God an Antisemite?", which questions whether or not God hates the Jews, especially when we consider the the fact that God has allowed them to be slaughtered for 2000 years, and has seemingly gone back on a promise that if Jews were restored to their land, they would be safe and eternally protected from another Holocaust. What I found interesting is that the author of the article, Shmuley Boteach, is a prominent Rabbi and best seller and devout adherent to Judaism and Torah laws. He even mentions his piety in the article, as well as the fact that Israel, while democratic, is still largely faithful to its Torah-based foundations as a people. So in light of this, what is God's problem? Why does He have it out for the Jewish people? Now of course, the entire world is aware of the backdrop surrounding the conflict which entangles Israel, where violent militants in the Gaza strip have been launching rockets at Israel since 2005 in opposition to the rising peace which many nations surrounding Israel had been pursing since the late 1970s, namely Egypt and Jordan, both of whom were longstanding adversaries to the state of Israel, but who are now both signatories to peace accords signed in 1978 and 1994 respectively. Jordan subsequently gave the Palestinians the right to govern the West Bank, while Israel maintained control over the Gaza Strip until 2005, after having seized it from Egypt during the 1967 six day war. Contrary to western opinions, the Gaza Strip was not "occupied" by Israel. Egypt relinquished claim over the Gaza strip as part of the Camp David accords in 1978 and refused any subsequent offer by Israel to give control of the Gaza Strip back to Egypt. In 2005, after the 2nd intifada, which was a terror offensive launched by the Palestinian terrorists in response to the failure of the Camp David Summit in 2000 to reach a plan for two-state solution, and of which led to widespread deaths among Palestinians and Israelis, Israel had unanimously withdrew all military and settlements from the Gaza Strip in the hopes for peace with the Palestinians. During the second Intifada, which was orchestrated by Hamas—not in response to any military action by Israel, but in the name of opposing the rising status quo that was headed towards peace in the region—Gaza terrorists would carry out horrible atrocities targeting civilians with rockets and car bombings. Yet this was not enough to convince the world of how dangerous and brutal Hamas was as a terrorist organization, nor did it serve as enough of an indication that Hamas was actually subversive to the peace that the Arab world was seeking at the time. Hamas continuing to fire rockets, even after Israel unilaterally withdrew from the Gaza Strip in 2005, was still not enough to convince westerners that Hamas was the real threat to stability in the region, not Israel. But nonetheless, despite all the evidence and real-time actions by Hamas, which placed Israel on the defensive, leading to collateral damage, many in the west still pursued the notion that Israel was the aggressor, even despite the fact that Hamas's charter was to wipe Israel off the map completely. Fast forward to 2023, after years of rocket attacks from Gaza militants, Hamas would carry out the worst atrocity on the Jewish people since the Holocaust, killing 1400 of them in a brutal and gleeful display of savagery, all of which they filmed and displayed online. Yet, in this scenario, one would think that the world would finally see the true nature of Hamas with their savagery on full display, ……but the opposite happened. The masses in the west cheered and marched in solidarity with Hamas immediately after October 7th. A student group at Harvard University wrote a letter outright blaming Israel for the attack. Meanwhile, Hamas's supporters across the world were praising God for October 7th and saw it as a sign that God was on their side. Seemingly, everything and everyone turned against Israel, which begs the question, Why? How could this have happened? How could God have allowed His own people, the Jewish people, to be massacred, after promising them that they would always have a safe dwelling in the land of Israel. The answer is that God did allow the Jews to be massacred on October 7th. And not only that, God allowed Israel to stumble and carry out attacks in self-defense that would leads to scores of civilians being killed in Gaza, further exacerbating the enmity against Israel. So what is going on? Before I answer, let me give a backdrop about my role in this matter.

Back in 2019, I wrote a book about Catholic history, and in the book, I undertook solving an age old mystery concerning the number of the beast, 666. 666 is a number that has garnered much suspense because it is a number associated with Satan, the great adversary and enemy of God and God's people. In Christian tradition, 666 is

defined as the number of the beast and over the centuries, there have been many attempts to figure out what and who this number stands for. Traditionally, this number is associated with a person, but others have assigned to systems and kingdoms. In any event, there were myriad attempts by scholars and mystics alike to solve the mystery of 666. I embarked upon solving the riddle and came up with Mars 360, which is the revolution of Mars around the Sun and its influence on humanity. Even before 2019, I was a very active researcher in astrology and surmised Mars as having a negative influence on human behavior. Combining this outlook with my assertion of 666 equating to Mars, I was able to unlock a number of relevant associations through divine inspiration it seems, but not from God. The main one, which I stumbled across by trying to deliberately link or force fit 666-Mars influence to events in Israel, was the timing of increased rocket attacks against Israel during configurations in the heavens where Mars is aligned in a certain manner. That alignment was Mars being within 30 degrees of the lunar node, which I presented to the public in 2019. By observing when Mars would be within 30 degrees of the lunar node within a calendar year (January thru December), I was able to find a strong correlation between the escalation of rocket fire from Gaza into Israel relative to the rest of the year. It was discovered that since 2007, Gaza militants would fire their highest intensity of rocket fire when Mars would be within 30 degrees of the lunar node. I made the inference that this is how Satan opposes the Jewish people, using Mars as a vehicle to inspire a higher degree of violence when it enters within a certain alignment. At the time, I discerned that this is information that Satan wanted me to know. I've maintained that all of this is part of a divine revelation. Ruminating on this led to more inspired writing, of which it was revealed to me, the nature of this dynamic and the purpose. So apparently, Satan uses Mars to attack the Jewish state, and has been doing so for centuries, as was the case in AD 70, when the Romans, under the banner of Mars, was able to make war against God's people and defeat them, even destroying God's Holy Temple. I was also informed that recently Satan had brung a case to God accusing the God of Abraham Himself of being a God of war because the Muslims kept praising God after performing acts of terror. God was aware of this and allowed Satan to use a prophet and also dial up his influence on Islamic terror so that this designation of war/terror can be assigned to Satan, and not God. I received this revelation back in 2019. One can look up article called "the Satan's Temptation of Moshiach Ben Yosef" and see that it has already been revealed that Satan has been granted permission by God to influence the enemies of Israel, gain credit for it through a prophet, so that God will be able to present Himself as a God of love and peace. In this regard, one can say that God did and is allowing Satan to attack the Jewish people of Israel by way of Mars, all for the purpose of satisfying His own ego. He is more worried about His reputation than His own people. If this continues, there will be no more Israel, but as far as God is concerned, at least He will be able to say He is a God of Peace. What a sick God.

None of this should be of any surprise to the Jewish Orthodox community. Those steeped into Talmudic literature know about Samael, who is the king of all demons and is associated with Mars. Here I am demonstrating exactly how, proving the actual mechanism. After discovering this Mars aspect by which it triggers a higher intensity of rocket fire against Israel, I was able to predict in advance for five consecutive years, the highest escalation phase of rocket fire against Israel within a calendar year by observing when Mars would be within 30 degrees of the lunar node. I was even able to forecast the October 7th attacks, well before Israel's own intelligence agencies. There is plenty of literature and warnings given ahead of time since 2019. I have emailed many people in Israel about this Mars influence on their security since 2020, after receiving the revelation. Just look up "Anthony of Boston" "Mars" "rocket attacks" or "2023 Memorandum to the State of Israel about Mars influence" and you will find much information about this. Some articles are written in Hebrew.

As a prophet of Satan, I would advise that Israel take matters into their own hand and push back against God a little. Use wisdom of the Torah. In keeping with the Torah tradition, Israel can make a deal with the Satan in a way that would spare them from judgement, at least according to what was permitted in the Torah. In the book of Numbers, when Moses made the bronze serpent in order to stop the actual serpents from biting and killing the Israelites, a precedent was set, by which it is permitted for Jews to make an image for the sake of protecting the Jewish people from harm. In this case, an image of Mars can be made and when attacks upon the Jews occur, this

image of Mars, whom I call Armaaruss, can be displayed publicly through talking about its influence via media. Or an actual robot in the form of Ares, a god of war, can be made. This is a concept that could help Israelis fend off Mars influenced attacks.
